speed-i-Jet 798 The mobile pen-printer

Take advantage of a new independence:

speed-i-Jet 798 is the solution when you need to print individual text, consecutive numbers, date and time, and still remain mobile! You can print on any absorbent surface smooth or irregular, whether with or without contact, even if it has an irregular surface.

Print without labels

There are numerous potential fields of application. Examples from the almost infinite variety of possible applications are in logistics departments, QA systems, and medical practices.

A concrete example is the release of goods for dispatch following a visual inspection. In future, such tasks can be carried out quickly and easily using a *speed-i-Jet 798*.

Plug-and-Play

After the software has been installed, all the texts you need can be defined in the program, and then are sent to the *speed-i-Jet 798* via USB cable. And of course, you can change the freely configurable text as often as you need.

And now it's ready for use!

Position the *speed-i-Jet 798* above the surface you want to print on and press the red button as you move the pen.
